

# FRONTIER WARGAMING

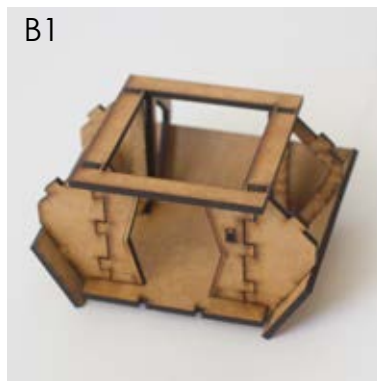

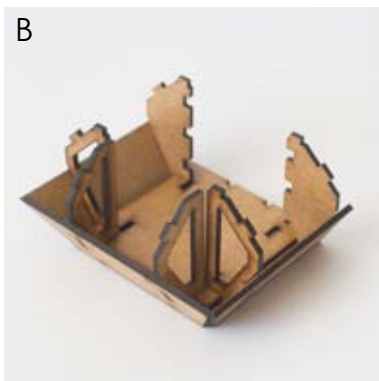

## SCI-FI WATCH TOWER

Tools you might need during the assembly: hobby knife, file, PVA (white glue) or super glue or epoxy glue.

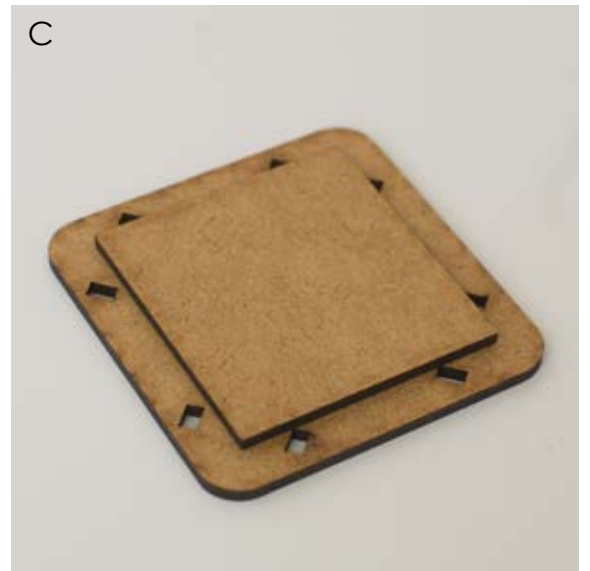

1. Attach the pillars to the floor, as shown on picture "A".  
Glue the parts together for better durability.

2. Attach the walls, the roof frame and the door, as shown on pictures "B", "B1" and "B2".  
Glue the parts together, for better durability.

3. Glue the two parts of the roof together, as shown in picture "C".

4. Glue all the parts of the searchlights as shown in pictures "D" and "D1". Mount the searchlights on the roof, as shown in picture "D2".

5. Attach the posts and the ladder to the base and floor of the platform as shown in picture "E"
